

## PRODUCT APPLICATION

# **WARNING - DANGER**

These products should only be used where point-of-operation guarding devices have been properly installed and maintained so that all appropriate OSHA and ANSI B 11.1 regulations and standards are met. Misapplication of these products on machinery lacking effective point-of-operation safeguards can cause serious injury to the operator of that machinery.

### **PRODUCT LISTINGS / CHOICES**

This catalog and other information from REES, Inc., and its authorized distributors provides product options (choices) for further investigation by users having technical expertise. It is important that you analyze all aspects of your application and review the information concerning the product in the current catalog. Due to the variety of operating conditions and applications for the products, the user, through their own analysis and testing, is solely responsible for making the final selection of the product and assuring that all performance, safety and warning requirements of the application are met. We endeavor to apply our design and manufacturing expertise through the development of products that have high value added content and to that end we reserve the right to modify designs in the course of improvements of the quality of our products or extending their field of application to facility production. This does not commit us to replace earlier versions.

### **REPAIR PARTS POLICY**

In order to maintain the electrical, mechanical and legal integrity of our devices we DO NOT generally offer for sale any part that requires any disassembly of any portion of any switch. A “Field Repair Waiver” is available to cover simple repair for those companies willing to assume responsibility for the work. It is only issued for the replacement of parts judged to be field replaceable after review. Major overhauls will NOT be considered. We do sell those EXTERNAL items (i.e.: arm assemblies, knobs, springs, handles, lamps, lenses etc.) that are designed for field replacement. Also, we provide a reasonable “in Factory” repair service subject to part inspection.

Please call a sales representative for details.
