## To use this worksheet:

Determine from your circuit diagram the number of positions desired and the number of circuits to be controlled. Place an " $X$ " to indicate what contacts should be closed in which position. Draw a vertical line as shown in the examples below if contacts are to be continuously closed in consecutive positions. Omit the vertical line if contacts are to be open between consecutive positions. See circuit \#8 in both examples below work grid.

Please email to Rees, Inc. at sales@reesinc.com or fax to 260-495-2186 when completed.

**Note: Position \#1 is always the LEFT position.

= Contacts closed continuously in consecutive positions

Example: 04925-520
Heavy duty selector, 4 positions, 8 contacts

| Pos | Legend | $\mathbf{1}$ | $\mathbf{2}$ | $\mathbf{3}$ | $\mathbf{4}$ | $\mathbf{5}$ | $\mathbf{6}$ | $\mathbf{7}$ | 8 |
